## Signature Messages

This book contains an alphabetical list of Signature and DOS messages. For Signature messages, the book provides an explanation of the message, along with a suggested user response. For additional information, refer to the following IBM publications:

- *IBM Signature Installation and Learning Guide*
- *IBM Signature Reference Guide*
- *IBM Signature LAN Administrator's Guide*
- *IBM Signature Quick Reference Card*
- *IBM Signature Keyboard Template*
- *IBM Signature Technical Reference*

**Note:** The *Technical Reference* can be purchased separately from IBM. For ordering information, contact your IBM Marketing Representative or Authorized Dealer, or call IBM Support as described in "Signature Product Service and Support" in the *Installation and Learning Guide*.

DOS messages are not explained in this book. For information about DOS, refer to your DOS book.

---

### Access denied.

**Explanation:** Refer to your DOS book for more specific information.

---

### Application error.

**Explanation:** Signature encountered an unexpected error, which indicates a serious situation. It may mean that an error occurred in the memory being used by Signature, the Signature program file is damaged, or there is a hardware problem.

**User Response:** Save all open files and exit Signature. Restart Signature. If the problem persists, exit Signature again, close all other programs, and press **Ctrl+Alt+Del** to restart the computer. If the problem still persists, reinstall the Signature program file (SIG.EXE) from the original Signature program diskettes.
